Assessment Instructions

Task overview

This assessment task includes 27 quiz questions. Read each question carefully before typing your response in the space provided. To achieve a satisfactory for this assessment, all 27 questions must be answered correctly.

This unit of competency consists of 2 knowledge assessments completed in this module. In addition to the Structured Workplace Learning and Assessment (SWLA). You must complete both sets of assessments related to this unit to be deemed competent.

Assessment Information

Submission

You are entitled to three [3] attempts to complete this assessment satisfactorily. Incomplete assessments will not be marked and will count as one of your three attempts.

All questions must be responded to correctly to be assessed as satisfactory for this assessment.

Answers must be typed into the space provided and submitted electronically via the LMS. Hand-written assessments will not be accepted unless previously arranged with your assessor.

Reasonable adjustment

Students may request a reasonable adjustment for assessment tasks.

Reasonable adjustment usually involves varying:

- the processes for conducting the assessment (e.g. allowing additional time)
- the evidence gathering techniques (e.g. oral rather than written questioning, use of a scribe, modifications to equipment)

However, the evidence collected must allow the student to demonstrate all requirements of the unit.

Refer to the Student Handbook or contact your Trainer for further information.

Please consider the environment before printing this assessment.

Quiz QUESTIONS

Question 1: Distressed, aggressive and relaxed are examples of a companion animal demonstrating different behaviours.

Answers:

- a) True
- b) False

Scenario

You are an animal care attendant at Happy Paws Animal Care Facility. The following services are available:

- Animal Housing
- Emergency Hospital (domestic and rural animals)
- Rescue and Adoption Centre
- Daycare
- Grooming
- Training School

You are allocated your responsibilities for the day, you are an all-rounder, meaning you work in every department. Every day you report to the main office where you are allocated your role and work for the day.

The following questions will be based on your role and the work you may encounter in a variety of animal care environment.

Question 21: A dog was hit by a car and has been brought into the Emergency Hospital. The Vet has come to assess the dog. Whilst waiting to see if its owner comes in to collect the dog, we will need to put it into the Animal Housing. Before we transfer the dog there, you have been tasked to check the dog over and see if there are any hygiene issues that need to be addressed.

What steps do you take?

Answers:

- Take the dog to the Animal Housing section, and you can hose the dog down in the kennel
- Check the dog's skin, coat, and external features to make sure there are no identified issues
- Take the dog to the groomers, and they deal with it
- No action required, take the dog to the Animal Housing

Question 22: You are working today in the Animal Housing section of the facility. The weather reports that there are severe thunderstorms, strong winds and potential flash flooding.

In this situation, would you move the animals from external housing into internal housing and secure shelter to protect them from the weather events?

Answers:

- True

b) False

Question 23: In the Animal Housing section, you have been tasked to clean the kennels and cages of the animals staying onsite. You have found a bunch of kennels and cages that have animal faeces and urine in them.

What steps do you take?

Answers:

- a) Remove the animal, its bedding and toys from the kennel/cage and leave the kennel/cage
- b) Remove the faeces and clean the kennels/ cages using cleaning products**
- c) Leave the cages and report this to your supervisor
- d) Spray air freshener into the cage to make the smell

Question 24: You are working in the Animal Housing Section. One of the dogs been diagnosed with Parvovirus. You need to tend to the dog and clean their cage. How best do you deal with the situation?

Answers:

- a) The dog must be moved to isolation and protocols must commence. After this, the cage must be thoroughly cleaned.**
- b) Remove the dog from its cage and put it into a clean cage.
- c) Leave the dog and cage alone, with minimal contact and interactions
- d) Euthanise the dog

Question 25: As part of your role in maintaining animal housing and welfare, you are responsible for:

- Feeding and watering the animals
- Removing rubbish
- Removing soiled bedding and resetting with clean bedding
- Providing enrichment items

Answers:

- a) True**
- b) False

Question 26: Positive Reinforcement, Low-Stress Handling and Gentle Restraints are examples of what?

Answers:

- a) Cleaning and animal hygiene techniques
- b) Animal Training Technique
- c) **Safe and humane animal handling techniques**
- d) Animal Enrichment Techniques

Question 27: Brushes and combs, Shampoo and Conditioner, Nail Clippers, Ear cleaners, Dryers and Towels and Deshedding tools are examples of what?

Answers:

- a) Veterinarian Diagnostic Tools
- b) Pet training equipment
- c) **Animal Hygiene Care Equipment**
- d) Animal housing accessories
